BOOK SYNOPSIS

The International Papers in Political Economy (IPPE) series explores the latest developments in political economy. This twelfth volume presents a collection of eight papers, analysing the emergence and economic problems of the emerging economies during and after the international financial crisis of 2007-8 and the subsequent Great Recession. The contributions range from an analysis of the international financial crisis of 2007-8 in general terms to an analysis of the same but concentrating on the emerging economies, before turning to groups of economies, Arab, African and Eastern European countries, and two relevant but individual countries, namely China and Turkey. This book offers students, scholars, researchers and policy-makers detailed analysis and informed commentary on the origins of the international financial crisis of 2007-8 and the great recession by focusing on its effect on emerging countries.
